Abhishek Yadav

Business Analyst | Cloud Software Development | IT Support | Agile methodology|Power BI|Cloud Computing
Dublin, County Dublin, Ireland

Summary

Hi, I’m Abhishek Yadav, a Business Analyst and customer-centric problem solver across IT support, digital transformation, and data-driven decision-making. I’ve worked in Agile and hybrid environments delivering scalable, well-documented, and user-focused solutions that enhance businessPreviously at Prajeev Investments, I led business analysis for ERP, CRM, and mobile integrations—designing SQL automations and Power BI dashboards that cut manual work by 40%. I wrote BRDs, SRS, and SOPs, improved compliance through Change Control processes, delivered technical presentations to stakeholders, and supported UAT cycles that reduced post-release issues by 20%.I completed my MSc in Cloud Computing at NCI, refining my skills in Power BI, SQL, Python, and modern cloud technologies (AWS, Azure). I combine analytical thinking with business insight to bridge users, technology, and strategy.Passionate about:Turning raw data into insights, optimizing workflows, enhancing user experience, and supporting digital transformation across Ireland’s tech sector.Open to:Business Analyst • Data Analyst • IT Analyst • Product/Operations Analyst roles in Dublin Outside of work, I enjoy exploring tech trends, staying active, and continuously learning ways to make systems smarter and simpler.Let’s connect and build impactful solutions together!

Experience

Airport Energy Ltd

Customer Supports Analyst
October 2024 - Present (1 year 9 months)
Dublin

◦Analyse customer requirements and gather, understand, and document business objectives and specifications for medium and large reporting and system projects , producing BRDs, functional specifications, and SOPs with full requirements traceability through the SDLC.

◦Scope and build new reporting requests with business stakeholders , translating reporting requirements into Power BI dashboards and SQL-backed reporting solutions, and providing ongoing technical support to business users on the reporting application suite.

◦Provide technical support on the reporting application suite , answering and assisting with support requests, triaging issues, and identifying recurring patterns that inform system enhancement recommendations to the technology team.

◦ Delivered end-user technical support for Windows and macOS systems, achieving a 95% first-call resolution rate.

• Manage 25+ technical tickets daily via Jira and ServiceNow, maintaining SLA compliance and 95% first-call resolution rate demonstrating structured problem diagnosis and clear documentation skills.

• Conduct root-cause investigations and produce structured incident reports with impact summaries, escalating with full traceability for engineering teams.

• Support technology operations audits, and incident trend analysis reducing aged backlog items by 30%.

◦Manage payment logs and verify payment transactions with banks, providing customer support for payment processing and resolving payment-related issues.

◦ Support enterprise applications (Zendesk, Smartsheet) with customer-first mentality, prioritizing user satisfaction in every interaction.

◦ Delivered customer-centric support through email, chat, and remote tools (TeamViewer, AnyDesk).

◦ Delivered onboarding-style training to internal staff on payment hardware setup, software configuration, CRM workflows, and new entity enablement.

National College of Ireland

Lab Assistant

September 2024 - January 2025 (5 months)

Dublin, County Dublin, Ireland

Provided desktop and system support for student labs (Windows & Linux environments).

Guided troubleshooting sessions for API-driven projects, using tools like Postman and SQL for backend testing.

Supported students and faculty with API debugging, IDE setup, and code troubleshooting (Python & C++) in Linux/Windows labs.

Provided technical support in Python, SQL, AWS Cloud, Github, HTML, CSS, JavaScript, XML, Power BI, React, and other relevant technologies

Assisted in enterprise-style networking and SaaS troubleshooting, including VPN, DNS, and authentication issues.

PRAJEEV INVESTMENTS LTD

2 years

Associate Business Analyst

May 2023 - January 2024 (9 months)

Kolkata

• Produced Business Requirement Documents (BRDs), Standard Operating Procedures (SOPs), and System Requirement Specifications (SRS) for 15+ integration projects across CRM and ERP platforms ensuring clear traceability from requirements to delivery.

• Coordinated end-to-end UAT cycles: prepared test scripts, validated results against acceptance criteria, and ensured full traceability to requirements across cross-functional teams.

• Designed Power BI dashboards integrating SQL datasets and business KPIs, reducing manual report preparation time by 40% and enabling faster decision-making for C-level stakeholders.

• Managed change requests within SDLC frameworks, ensuring technical precision, policy compliance, and accurate documentation throughout the delivery lifecycle.

• Performed process and system analysis to identify automation and improvement opportunities, contributing to a 12% gain in operational efficiency.

• Developed and maintained test documentation (test plans, test cases, and scripts) to validate system enhancements and ensure regression stability.

Business Analyst

February 2022 - January 2024 (2 years)

Kolkata, West Bengal, India

Developed and maintained comprehensive financial models through process mapping, enhancing portfolio returns over 12 months.
Led requirement analysis and documentation for HRIS and finance-related applications, streamlining internal operations.

Created dashboards in Tableau/Power BI that translated complex workforce data into actionable insights for senior leaders, leading to measurable improvements in retention (+12%)
Delivered pay equity analysis for multinational clients, identifying gaps and recommending remediation strategies aligned with budget and HR policies.
Automated reporting processes using Python and SQL, reducing manual reporting time by 40%.
Wrote BRDs, SRS documents and SOPs to ensure a single source of truth for requirements and calculation logic partnered with developers to translate business rules into traceable test cases for QA using Zendesk.
Acted as trusted advisor in client workshops, simplifying statistical models into clear narratives for non-technical stakeholders.
